### **DETAILED ACTION**

## Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1-10 are rejected under 35 U.S.C. 102(e) as being anticipated by McGowan et al. (US Patent No. 5937345).

Regarding claims 1, 2, 10 McGowan teaches: a mobile station 314 communicating at the signaling layer 206 (network layer respectively) (Figure 2A), where the message sent goes through the RR (Radio Resource), MM (Mobility Management) and Call connection unit which is part of the CM (Connection Management) unit 306 (Col 4, lines 56-57) and (Col 5, lines 15-20).

Regarding claim 3, the lower levels 204 and 202 are shown as part of the routing process employed by the message routing system 200.

Application/Control Number: 09/467,364

Art Unit: 2667

Regarding claims: 4, 7 and 8 McGowan teaches: routing first to a RR function then to a MM function then getting to the CM portion of the system (follow the arrow direction of data flow), coming from an uplink direction from a mobile station 314 (fig. 3).

Regarding claims 5 and 6, McGowan teaches: the downlink message is shown to travel from the CM portion of the layers of the system to the call interception unit 412 in the direction of the mobile station 426, no where is any acknowledgement required in this system (Figure 5).

Regarding claim 9, McGowan teaches: an MSC in the system of this embodiment (Fig. 3) and (Col 2, line 63), and a BSC 124, and BTS 122, (Col 3, lines 32-33).

## Response to Arguments

Applicant's arguments filed 10/11/2003 have been fully considered but they are not persuasive.

Regarding claim 1, page 5, lines 1-2 of the remarks, Applicants argue that "a message still passes through each of the CM, RR and MM functional layers". Examiner respectfully disagrees. Applicants are directed to figure 6 and col. 6 lines 29-53, the reference discloses the call is directly routed from the RR 414 to call interception unit 412 without passing MM layer 416 and CM layer 424.

Regarding claim 5, page 5, lines 1-2 of the remarks, Applicants argue that the reference does not teach the step of "processing downlink network layer messages…such that the network layer do not pass through other protocol stacks". Examiner respectfully disagrees. This argument is responded above with respect to claim 1.

Application/Control Number: 09/467,364

Art Unit: 2667

### Conclusion

Page 4

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thai D Hoang whose telephone number is (703) 305-3232. The examiner can normally be reached on Monday-Friday 8:30am-5:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Chi Pham can be reached on (703) 305-4378. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9314.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 305-4700.
